Adapt Tankless

powered by
CYCLONE

THE SAME CYCLONE TECHNOLOGY
BUT NOW TANKLESS

ENDLESS HOT WATER IN ITS DNA

To make the most reliable commercial tankless water heater, we started with our most reliable technology, **Cyclone**. The same helical heat exchanger technology that we've built our reputation on. Then we made it adaptable with multiple venting options, flexible gas line compatibility, indoor and outdoor installation applications, and an easy-to-install wall mount.

So while it's our newest unit, at its core it's everything you know and love about A. O. Smith.

SOLIS[®] Flushometer with Sloan
Track-on Run-on Detector
notifies staff of run-on conditions
electronically via the
SC Argus Pro IoT platform.

SLOAN TRACK-ON™

Water waste has nowhere to run

When a commercial flushometer gets stuck open, every minute counts, and early detection can mean the difference between a quick fix and significant issues. Sloan Track-on is an innovative, first of its kind solution installed in place of the vacuum breaker on any top-spud flush valve. Designed to alert facility teams that a run-on condition is detected before it leads to excessive utility costs or flooding. Available with Sloan's most popular flushometer models or as a vacuum breaker retrofit on any industry-standard exposed top-spud flush valve. Sloan Track-on brings run-on detection to the restroom increasing confidence that your restroom is functioning as intended.

FEATURES & BENEFITS

Detects run-on conditions lasting 30 seconds or more and immediately triggers an alert.

Silent remote alerts with text or email notifications via SC Argus Pro IoT platform.

Audible local alarms with a 95 dBA continuous audible alert for up to 72 hours that automatically disarms when the run-on conditions clear.

Promotes sustainability goals by enabling rapid response to run-on conditions, helping reduce avoidable water waste.

Easy upgrade the audible model to smart IoT connectivity.

THE MIFAB ADVANTAGE

IN STOCK AND READY TO SHIP!

QUICK HUB COUPLINGS:

NO NEED TO SEPARATE THE GASKET FROM THE SHIELD - INSTALLATION READY. JUST PUSH ON THE PIPE!

SYPHONIC DRAINAGE:

PIPES ARE FLUSHED AT HIGH VELOCITY AND SELF-CLEAN AS AIR EXITS THE SYSTEM. PIPE DIAMETER & MATERIALS ARE REDUCED BY HALF!

RPZ AND DC BACKFLOW:

ACCESS BOTH CHECKS FROM ONE ACCESS POINT. ALL STAINLESS STEEL BODY AND SHORTEST LAY LENGTH!

GRP TRENCH:

RIGID LIKE POLYMER CONCRETE BUT NOT FRAGILE. COMPETITORS MAXIMUM TEMPERATURE AT 140°F. OUR MAXIMUM TEMPERATURE AT 212°F!

TOP SET STRAINERS:

BRING THE STRAINER TO GRADE WITHOUT REMOVING THE GRATE AFTER THE CONCRETE POUR. JUST TURN THE THREE PHILLIPS HEAD SCREWS!

HDPE INTERCEPTORS:

LIFETIME WARRANTY. GENERIC CUT TO FIT ADS RISERS. PDI AND ASME APPROVED!

YOUR INFRASTRUCTURE EQUIPMENT PARTNER

For over 75 years, V-Systems has been providing top-tier equipment infrastructure solutions to commercial, industrial, and municipal partners. With 80 product lines, including HVAC, plumbing, fire protection, and water / wastewater systems, we are dedicated to delivering unparalleled quality in sales, consultation, installation, and maintenance.

WHY CHOOSE US?

Diverse Product Range

From boilers, pumps, valves, and package treatment systems, to the premier Club Car Carryall utility vehicles, we have the equipment you need to get the job done right.

24/7 Service Hotline

Our commitment to excellence means we are always here for you, ready to troubleshoot and support your critical infrastructure needs around the clock.

A Proud COSTARS Vendor

As a pre-qualified vendor through Pennsylvania's Cooperative Purchasing Program, we offer a cost-effective and streamlined experience for public entities.

Training & Education

Our comprehensive Training and Education Program, offers up-to-date knowledge and PHD credits to engineers, contractors, and end-users.

Chapter President's Report

October 2026

By: Michael Finnigan, CPD

Has this year been flying to fast for anyone else? It's hard to believe it is October already!! 40-50 degree nights, 60-70 degree days, tree leaves are changing, football is back.....it's the best time of year!!

For our September meeting we welcomed Cameron Baucom from Charlotte Pipe where he went over Special Waste Piping Systems. This was an extremely informative presentation and I encourage you to reach out to Cameron with any questions. As always thank you Cameron for delivering a great presentation.

This month the meeting will be held October 21st, 2026 at Rizzo's of Windber. We will be welcoming Kevin Coyne and Keith Hamilton from CONCOA. The meeting will cover "Integrated Cryogenic Systems". This presentation will go over on-site Cryogenic system design and products for use where bulk and microbulk tanks are not an option. As well as cover some basics of vacuum jacketed piping design. Make sure to register on our website! (www.johnstownaspe.org)

Our chapter delegates will be traveling to Oklahoma City, Oklahoma to attend the 2026 ASPE Convention & Expo, being held from October 8th – October 14th.

November's meeting will be held on November 11th, 2026 we will be joined by Claire Weiland from Highland Tank presenting on "Grease Removal Systems"

On December 16th we will be having the Italian Feast with Holiday Show and tell.

CPDT Exams will be held from October 26th, 2026 – November 6th, 2026 – Please visit <https://aspe.org/education-credentialing/cpdt/> for more information.

CPD Exam dates for 2027 will be released in November 2026 – Please visit <https://aspe.org/education-credentialing/cpd/exam/> for more information.

We still have limited spots for presentations for the 2026-2027 season, please reach out to Cody Adomnik (Cadomnik@hflenz.com) in regards to any presentations.

Thanks,

Michael Finnigan
ASPE Johnstown Chapter President

Chapter VP Technical's Report

OCTOBER 2026

By: Cody Adomnik

It is officially Fall and the best month in my opinion. I hope if anyone made a fantasy team you are doing better than me lol it's a rough start.

Our September Meeting was held on September 16th, 2026. We welcomed Cameron Baucom from Charlotte Pipe. Cameron presented on Special Waste Piping Systems. Which provided knowledge regarding laboratory biosafety levels, specific products used for special waste piping, installation methods, and fire-resistive properties. As well as when and why special waste systems are specified, along with the applicable codes and standards. Thank you, Cam, for coming in we greatly appreciate it!

This month the meeting will be held October 21st, 2026 at Rizzo's of Windber. We will be welcoming Kevin Coyne and Keith Hamilton from CONCOA. They will be giving a presentation on "Integrated Cryogenic Systems". This presentation will go over on-site Cryogenic system design and products for use where bulk and microbulk tanks are not an option. As well as cover some basics of vacuum jacketed piping design. Make sure to register on our website! (www.johnstownaspe.org)

November's meeting will be held on November 11th, 2026 we will be joined by Claire Weiland from Highland Tank presenting on "Grease Removal Systems"

December will be the Holiday Show and tell.

We are running low on available months for the upcoming 2026/2027 meetings, if you have an idea or are interested in giving a presentation, please contact me. The chapter website is a work in progress, and we will be trying to update it as the year goes for quick access to photos of events and the most up to date Newsletter, please be patient as we work through these changes

Thanks,

Cody Adomnik
